

# Arce'Infissi

Doors and windows made in Italy.  
Est. 1974.

## QUALITY AND DESIGN MADE ITALY

Since 1974, Arcè's goal has been creating extraordinary doors and windows for the most demanding clients. In order to achieve this objective, in the last 40 years Arcè has never stopped investing in its human resources, the real treasure of the company. The passion and the know-how typical of Italian artisans were combined with the highest technology machinery available on the market, to create something unique.

## CUSTOMIZED PRODUCTION

Arcè's elegant design can be adapted to any architectural style and taste. All of us have different preferences: they could regard the material, the size, or the opening system of our doors and windows. Arcè creates its pieces with an elegant style, but at the same time it takes care of the characteristics which are important to the client. Think about your dream house and the design of its windows and doors, we will build them for you.

## GIVING SPACE TO YOUR IDEAS AND DREAMS

Nothing excites us more than seeing your projects realised, combining your creativity with our design and experience. Arcè has lived the past 40 years with the challenge of taking all its clients' ideas and make them reality. Depending on the different needs Arcè can advise on different aspects of doors and windows, to improve the general conditions of your house. The level of light coming from the inside, the glazing unit installed on the window and several other options can be projected to create the desired conditions in the house in terms of temperature, light and appearance.

## RAW MATERIALS AND ECO-SUSTAINABILITY

According to Arcè, succeeding does not only mean taking care of its clients, but it is also linked with having a positive impact on the territory and respecting the environment. Through years of research, we have learned how to operate in our market using resources in a way that will allow the next generations to have the same resources we had. For this reason the premium wood we produce with, comes from areas in which it is performed the practice of forestation. Arcè's wood suppliers are certified PEFC, which is the guaranty, that they support an eco-sustainable plantation and a controlled wood manufacturing.

## COLOURS

## GLAZING UNITS

Inner pane 4 low emission/16/outer pane 4 tempered

Thermal performance:  $U_w = 1,51 \text{ W/mq.k}$  /  $U_g = 1,40 \text{ W/mq.k}$   
 Energy: solar factor  $g = 61\%$   
 Light transmittance  $t_v = 79\%$   
 Acoustic performance:  $R_w = 30\text{db}$

3+3 low emission-14Argon/4/12 Argon/4 tempered

Thermal performance:  $U_w = 1,12 \text{ W/mq.k}$  /  $U_g = 0,90 \text{ W/mq.k}$   
 Energy: solar factor  $g = 55\%$   
 Light transmittance  $t_v = 71\%$   
 Acoustic performance :  $R_w = 36\text{db}$

The colours and glazing units shown above are just some of those available

## SHUTTERS, SKYLIGHTS AND SECURITY DOORS

In order to create that perfect aesthetic effect on your house, Arcè provides all those elements that could match with your doors and windows such as shutters, skylights and security doors.

Arcè makes its doors and windows proudly knowing that its clients selected the company to build part of an extremely important place, which is their home. This is the reason why we select only premium raw materials and we use the best technology available, to provide total safety and the best performance of our products. Arcè's doors and windows are projected to obtain the top score in the European performance test. The performance test, conducted by IFT Rosehaim, in Germany, confirms the quality and the great performance of our doors and windows.

#### **Resistance to wind test**

EN 12210 Class from C4/B4 to C3 B3

#### **Watertightness test**

EN 12208 Class from e900 to 9/A

#### **Resistance to air test**

EN 12207 4th Class

#### **Operational test**

EN 13115 1st Class

#### **Mechanical resistance test**

EN 13115 1st Class

#### **Mechanical duration test**

EN 12400 2 ndClass

#### **Impact resistance test**

EN 130049 3 Class

During the certification process, Arcè intentionally asked to increase the test's level of difficulty, in order to be 100% sure of the security and robustness of its products.

As specified in the European Directive 89/106/CE and following the law UNI EN 14351-1 and UNI EN 13659, on every product Arcè puts the CE mark, which testifies that the windows and doors comply with European Legislation.
